

## **OCCUPATIONAL HEALTH AND SAFETY QUALITY AND ENVIRONMENTAL POLICY**

The ALLscope Industrial Services team is committed to achieving a high standard of quality and value for products and service they supply to their customers. Our aim is to exceed our client's expectations and comply with the relevant Australian Standards.

The procedures used during any job will always insure the safety of our staff, our clients and general public. The procedures and products used will also be friendly to our environment. On completion all jobs are evaluated to ensure that hazards have been eliminated including environmental and OH&S. We will attempt to carry out this pledge as efficiently as possible to maintain our value for money promise.

These high standards will be achieved through both the company and it's employees actively demonstrating commitment to this policy. We encourage involvement in the effective management of an occupational, health and safety, quality assurance and environmental program through identification, assessment and control.

We also encourage our clients to eliminate hazards and reduce waste by maintaining equipment through our preventive maintenance programs. Our machine rebuilding facility also prolongs the life of equipment and reduces waste by recycling equipment. All product waste is recycled. This includes but is not limited to metals, paper and oil products.

ALLscope Industrial Services prides itself on quality and value products and services that are safe and environmentally friendly.

David E. Camilleri  
Managing Director
